

Geographical field trip to Venice and its lagoon

David Anderson and Cecilia Stefinlongo

Sources of information

Source of information	Website
A GIS (GeoExplorer) for viewing and overlaying historic maps of Venice and its lagoon	http://cigno.ve.ismar.cnr.it/maps/1200/view
MOSE mobile barrier project (explains the design of this hard engineering scheme for protecting Venice from severe high tides)	https://www.mosevenezia.eu/project/?lang=en (Includes video)
Life Lagoon Refresh project (detail on a soft engineering scheme that involves restoration of reedbed habitat and improvement of the lagoon environment and biodiversity)	http://www.lifelagoonrefresh.eu/ (Includes a videogallery under 'media')
The VIMINE (Venice Integrated Management of Intertidal Environments)	http://www.lifevimine.eu/lifevimine.eu/index.html (Includes 17 minute video with English subtitles)
A large GIS resource covering a range of lagoon characteristics (geology, biology, hydrology, climatology, etc.). Italian language.	http://www.atlantedellalaguna.it/
Città di Venezia website (includes a great deal of information and statistics on Venice, including flooding statistics). Italian language.	https://www.comune.venezia.it/
Part of the Città di Venezia website that includes slide shows from presentations about the lagoon in recent years (rich in images). Italian language.	https://www.comune.venezia.it/it/content/materiale-didattico-corso-formativo-sulla-laguna-venezia
